DE-KA Titan® Medical (Asia) Hong Kong Ltd.  
DE-KA Titan® Medical Germany

---

## Virus Description

We have been providing disinfecting services in Hong Kong since 2015 and have served a lot of medical centres, schools, churches, offices, residential units, and automobiles.

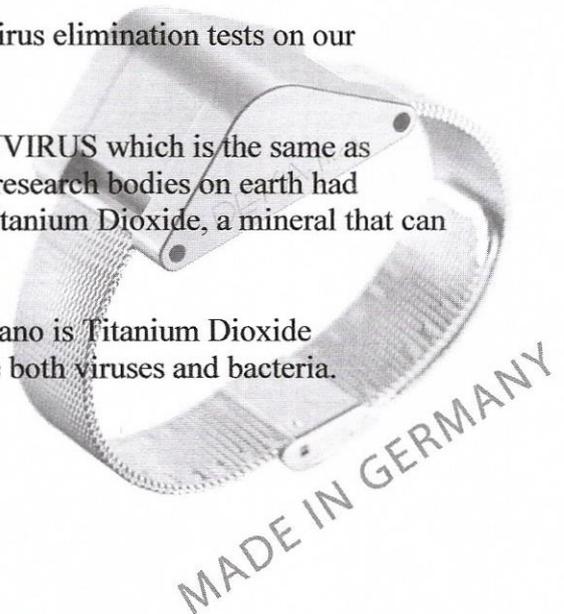

We started manufacturing disinfectant products in 2019 and Dr. Nano is one of our brands. We have German TUV tested on our products on the killing rate of bacteria >99.997% and the efficacy lasts for 30 days.

As for the test of virus elimination rate of Dr. Nano, so far there are no commercial test labs such as TUV and SGS allowed to conduct the test on COVID-19 due to COVID-19 is highly and dangerously infectious.

CMT therefore not able to get any lab to conduct virus elimination tests on our products.

However, It is known that COVID-19 is a CORONVIRUS which is the same as SARS. And many scientists from many renowned research bodies on earth had conducted research and tests on nanoparticles of Titanium Dioxide, a mineral that can kill viruses including SARS and CORONVIRUS.

Please note one of the product ingredients of Dr. Nano is Titanium Dioxide nanoparticles and therefore Dr. Nano can eliminate both viruses and bacteria.
